A PEER AT AUSTRALIA.—We are indebted to gentleman of this city, for the following synopsis of a letter from a friend who has found his way to Australia among the gold seeking folk: DEAR SIR: Permit me to give you a brief sketch

of the state of affairs in Melbourne, Australia, in October last. My friend from whose letter I extract, had been doing business in Brisbane, Moreton Eay, but the population decreasing, and probably being slightly effected with symptoms of the "gold mania," he was induced to pursue the course of other invalids by moving to Melbourne. His letter, for an Australia letter, is unusually short. It seems that having joined in the hunt, his waiting to particularize would only be losing time. Commencing abruptly, he breaks out by saying, "Nearly all the people in business here are amassing stores of wealth, and hundreds have enrolled themselves at the mines. Wages are high, and rising. Shoemakers, coopers, carpenters, &c., can make at least 20s (85) a day, and other mechanics much more. Painters realize £15 (875) a week. In short, every man willing to work can have profitable employment." Professional clerks are the only men who are badly paid, but they it appears, form no exception to the above statement. Their salary avarages \$1000 a year, a sum barely sufficient to maintain them at the high rates of living then existing. "Rents are running up fast. For one unfurnished apartment in the merest cottage in the suburbs \$4 and upwards is paid." Water was selling at \$1,25 per cask, wood \$2 to \$4 per load, flour \$12 per barrel, potatoes \$4,50 per cwt, eggs \$1,22 per doz. His account of the state of society is very flat-

tering. He seems to think that Melbourne is fixed upon as head quarters by a certain old general and talks of guns being as common as walking sticks. His comparison here does not convey a correct idea however. Had he stated that guns were as numerous as the props required to support declining British aristocracy, an approximation might have been arrived at. The municipal regulations, tho :gh not very stringent were rigidly observed, especially one requiring quiet folks to keep within doors at night. This however is attributed to their respect for his honor Judge Lynch, who convenes his court in the open streets about that time. His honor's circuit by the by is said to be very large, extending all the way from Melbourne to Ophir; and the dispatch with which he transacts business inspires the timid with profound veneration. His officers, the Bush-rangers, are numerous and highly efficient. Executions in particular are served with electric speed. Some "limb of the law" will have it that they are bac sheriffs, because they make no returns, but he is entirely mistaken, for as a farther proof of their efficiency, they invariably recover property, and

The arrival of two ships from the United States is noticed. Of the passengers he observes, "they were very much disappointed at everything being so dear, but consoled themselves with the hope that they would get plenty of gold."

as to returns their law actually prohibits them

All things considered, my friend sensibly remarks All things considered, my friend sensibly remarks that he should have remained in Brisbane; but a paronysm returning before the sentence is rightly closed, he affirms that "there is a good chance to do well in Melbourne yet, if one could get a fair start," and hints that his friend in Wheeling might do worse than make a trip to him some day, when both would pay a formal visit to the gentry at Ophir, the distance being about 80 miles; but his friend don't like the form of geverament, and his friend don't like the form of government, and having ciphered some when a boy, calculates that he might, some early morning, be found minus a head, and so declines. Yours &c., R.

GRAND LITEMARY AND ARTISTIC
COMBINATION.

Arrangements have been made to furnish the Knicker bocker Magazine; the Home Journal, and the New York Musical World and Times, to new subscribers for Five Dollars a year? This is cheap literature with a vengeance. The Knickerbocker is \$3 per annum; the Home Journal \$2; and the Musical World and Times \$3; making \$8 a year at the usual rates. That three such works can be obtained for \$5 a year, is a fact truly worthy the Calouc aze, which is just now being ushered in. Of the Knickerbocker Magazine, edited by Lewis Gaylord Clark, it is unnecessary to speak. For twenty years it has been the most genial, humorous and spicy monthly in the wor'd; and the present volume will be better than any which preceded it. The Home Journal edited by Geo. P. Morris, and N. P. Willis, is we Iknown as the best family newspaper in America, and the Ausical Wolrd and Times, edited by Richard Storrs Willis, with Lowell Mason, Geo. H. Curtis, Thomas Hastings, Win. P. Bradbury, Geo. F. Root, and other musical writers contributing and which gives, amone other things, over \$25 worth of music and a full course of instruction in harmony annually, is the very best musical journal ever published. These three publications will post a tamily up in everything worth k owing.—Art, science, literature, music, painting, sculpture, inventions, discoveries, wit, humor, lancy, sentiment, the new at fashions and other attractions for Indies; choice nev music to the Sabbath, the church and the fireside; reviews and criticisms of musica works, performers and performances; in short, the very pick and cream of novelty, incident, biog raphy, art, literature and science; including whatever can be given in periodicals to promote healthy anusement and solid instructions in the family, and help to make it better wiser, and happier, may be now obtained for \$5-aaddress DYER & WILLIS.

Important to Farmers!

A Sthe time is approaching when farmers will prepare their ground for spring crops, the subscribers respectfully inform them that they have a large quantity of good clean Barley, for seed, which they will sell at a moderate price, or loan on favorable terms, provided they get the produce, for which they will pay the market price, or fifty five cents per bushel; or will contract for a term of years, and will pay fifty-five cents per bushel, cash, for all the farmers will grow and deliver at our Brewery.

We make this offer to farmers, hoping it may induce them to raise as much Barley as we require, without purchasing in foreign markets; as we have hitherto been compelled to hay large quantities every season, in the States of Kentucky and New York, also in Canada, for our establishments here and in Pittsburgh.

and in Pitisburgh.

We beg leave to suggest the necessity of sowing plump, clean grain, and to be careful in harvesting, threshing, and cleaning, as we cannot use inferior or damaged Barley.

We will also have good Winter Barley, for seed, ready to sow next Fall.

The Gas, which is emitted in beautiful jets from small pertorations in Platina.

The Gas is generated as it is used, by the heat of its own combustion acting on the burner, connected with the Liquid in the Lamp. Thus it is a perfect and portable apparatus for creating and burning aeriform Gas.

Its construction is such, that all possibility of accident from its use is entirely removed; and the great simplicity of its arrangement renders it less liable to get out of order than any other kind of Lamp. It requires no cleaning and trimming, as do the Oil and Camphene Lamps, and burns equally well, either with or without a glass globe or shade, and per fectly free from smoke or odor.
